

PLANNER GROUPS

The Guiding Group members were asked to organize themselves into Planner Groups for each Strategic Issue based on their interest in and knowledge about the issue. Each Planner Group was asked to identify the current state of the Children, Adult and Family Services System in relation to their assigned strategic issue; develop two year, five year and ten year goals around that issue and develop an action plan that would help the system achieve its mission and vision. Each Planner Group was asked to incorporate into its action plan how it would communicate the plan and achieve customer input. It was also asked to identify the collaboration necessary to achieve its goals. Groups were also asked to identify group leaders or champions and a group facilitator to convene meetings and ensure that changes and enhancements to the initiative are included in plan updates.
