IAF Frequency Report

2003-2007

Individual Assessment Form (IAF) Frequency Statistics

The IAF Frequency Report summarizes the percentage of responses in each possible category for each question on the Individual Assessment Form submitted by Ohio Intermediate Care Facilities for the Mentally Retarded (ICFs-MR). The data provide a demographic and clinical profile of the ICF-MR population in Ohio.*

The IAF elements displayed are used in the calculation of Resident Assessment Classification (RACs) groups used to adjust the direct care rates of Ohio ICFs-MR for small and large peer groups. The IAF elements are broken down into three separate descriptive domains: adaptive (for ADLs), behavior, and medical.

These frequencies are based on the most recent IAF assessments for all ICF-MR residents in the state. Assessments are completed on admission, and quarterly thereafter. Residents whose next quarterly or next comprehensive assessment is overdue are excluded from these tables.

Questions and responses were summarized and tabulated from the assessments submitted for each quarter and then compiled for each calendar year. The percentages shown are based on the number of responses for each item divided by the total number of responses for that item. Therefore, percentages are calculated using the total number of valid responses for each item, rather than the total number of residents with assessments.

The information contained in this report will help the reader to have a better understanding of the demographic and clinical characteristics of Ohio's ICF-MR residents. This report will be updated each year to incorporate the responses collected in the previous calendar year. Also available yearly, the Case Mix Section in the Bureau of Long-Term Care Facilities at Ohio Health Plans provides an *ICF-MR Trend Report*, tracking quarterly mean and median case mix scores for both large and small facilities.

* Note: These IAF data account for all assessments submitted within a calendar year, but may not reflect final case mix scores due to penalty scores, adjusted rates for new facilities, and adjustments due to change of ownerships.
