

Adult and Dislocated Worker Program

October 2004

- 1) We have a customer, exited 11/10/03, who needs 3 single computer classes in order for her part time job to become full time, and they cost \$120 each. We would like to provide the classes, as the job looks stable, and it will lead to an increase in her pay.*

Unfortunately, they will not all begin before the 12 month follow-up. Will we need to re-register, and re-enroll her?

You would have to re-register and re-enroll this individual into WIA to provide these classes. If an adult or dislocated worker is exited, the only way to provide staff assisted core, intensive, or training services would be to re-enroll the individual.
