

Performance Measures

August 2004

- 1) *I ran a report from the mathematical data. Now, I remember you said it would be best to run a report using, I believe, quarterly status. I forget which date was the latest you said we should use for that report. This was due to no data being reported yet for a certain quarter so the annual report wasn't valid. Could you tell me that date again?*

You need to run the Rolling Quarters Report with a date of 8/15. You will find this also in the instructions.

- 2) *Does Supplemental Data have any affect on Wage Gain (or Replacement)?*

It has an effect. If there is no Unemployment Insurance (UI) or Wage Record Information System (WRIS) wages reported in the 1st and/or 3rd quarter after exit, and there are supplemental wages reported in that quarter, the individual will be excluded from any of the credential measures. Since they are not included in the measure, the impact is actually larger than the impact on the other measures.

- 3) *Is "Other" a positive entry for a credential?*

"Other" will be a positive outcome for credential. In the degree column you will find "other" represented by the number "6" in the numerator and/or denominator file.
